EXPERIENCE

JOIN DEVELOPMANT ACCELERATION TROOPS

Development Acceleration Troops organization (Devaccto IT)
is a learning acceleration organization in my school,
I learned more deeply about the material in the skills program and was able to practice my soft skills and hard skills

MY PROJECTS WHILE IN DEVACCTO IT

Developing IoT Based Devices:
This involves creating devices that connect to the Internet of Things (IoT), allowing them to interact with other devices and systems over the internet. The development process includes designing hardware and software, integrating sensors and connectivity modules.
